

# Weasy

CALL AND INFORMATION SOLUTION

**The Weasy ESII solution makes your customers free from waiting.**

**It displays dynamically the number of people waiting and when the counter calls, it starts vibrating, buzzing and displaying the point of service to go to.**

When another customer is called, Weasy automatically goes into standby and once repositioned on its base, it automatically charges.

Connected to all our reception management systems, it allows you to manage all your visitors.

- **Customization**

### EXAMPLES OF USE

The cards are available in self-service on their base at the reception. Your customers take one, it activates automatically.

The card can displays the number of people waiting dynamically, the waiting time or a welcome message. Your customers can continue shopping or learn about products.

When the counter calls, the card vibrates and indicates the meeting point. The customer then gives the card to the advisor who repositions it on the base to recharge it.
