Smart homes

Sigfox-enabled solutions address a wide range of use cases

The dog has gone out of bounds

Pool pH rising

You can even track everything from pets to your next hiking itinerary without worrying about weak GSM coverage and dropped signals.

Forget ruined vacations or business trips by putting an IoT-connected tracker in your bag to track the location of your luggage on your smartphone whilst you're traveling.

Growing numbers of seniors are staying longer in their own homes. IoT-connected time card readers monitor care providers and automate billing based on actual time spent in the home. IoT-connected watch sends alert in the event of a fall or if grandma pushes the panic button.

Outdoor sports: performance tracking and better security

Connected collar: no more lost pets

Connected luggage: no more ruined vacations or business trips

Time card reader: monitor the attendance of care providers for seniors

Fall detector: immediate alerts
